

Prioritizing Health & Safety

In partnership with Thielen Bus Lines

A sneak peek at our enhanced health and safety protocol to help ensure you have a healthy, safe, & extraordinary journey with R&J Tours!

- Travelers must fill out Pre-Trip Questionnaire & Waiver Forms.
- Motorcoaches are at reduced capacity until May 31, 2021.
- At every stop, the high touch areas like overheads, hand rails on steps, bathroom door, etc. will be disinfected.
- Nightly the motorcoach will receive a complete wipe down.
- At the end of every tour, a state-of-the-art Victory Electrostatic Sprayer will be utilized, which puts a charge to the cleaning solution, causing the solution to stick to everything like a magnet – even on the ceiling & underneath objects - thus providing excellent coverage! Below, Jesse from Thielen's is demonstrating.

- Onboard air quality is optimized for our motorcoach tours as we use Thielen's Bus Lines. Their fresh air exchange rate is six times an hour and they use MERV 8 filter media with an antimicrobial filter layer that provides even greater protection!
- Driver, Tour Director, and Travelers will use hand sanitizer every time getting on & off the coach.
- Strive to load the motorcoach from back to front and unload from front to back.
- We ask you bring your own masks to wear in required states and at required public events/vendors.
- Tour Directors and Drivers are trained in first aid and in the use of our R&J motorcoach onboard AED Defibrillators.
